Office Action Summary	Application No. 10/650,282	Applicant(s) CHEN ET AL.	
	Examiner Samuel A. Barts	Art Unit 1621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I claims 1-15 in the reply filed on 8/30/05 is acknowledged. Applicant also elected the species (TMCTS). The traversal is on the ground(s) that the inventions are not independent and distinct. This is not found persuasive because they are clearly drawn to different statutory classes of invention. Furthermore, the rejoinder process, as indicated in the restriction requirement, would connect the different inventions if and when the compound claims are deemed allowable.

The requirement is still deemed proper and is therefore made FINAL.

Priority

The instant claimed invention is drawn to "stabilized siloxanes". This application is a CIP of 10/015,326('326). The '326 application does not provide support that stabilized siloxanes was contemplated as an invention. The word "stabilized" or some equivalent term was not used in the entire application. Thus applicant's effective filing date is at best derived from the parent application 10/301,109. Thus the best possible effective filing date for this application is 11/21/2002.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1621

3. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Mayorga et al (US 6,858,697).
4. Mayorga et al disclose stabilized 1,3,5,7 tetramethylxyxlotetrasiloxane. See abstract, column 4 lines 62-67, column 11-12 and claims 13-27. The compositions disclosed in Mayorga et al read on the elected species of the instant application.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mayorga et al (US 6,858,697).

The instant claimed invention is substantially disclosed in Mayorga et al. See above 102(e) rejection. Some minor features, such as claims 6-7, if not explicitly disclosed in Mayorga et al would nonetheless be considered obvious modifications. One skilled in the art would be motivated to tweak process parameters in order to optimize the efficiency of making the stabilized siloxanes in Mayorga et al.
